## AI ENGINEER

---

**Python | Lang Chain & Lang Graph | FastAPI | Streamlit | LLM Integration | SQL | AWS**

Results-driven AI Engineer with 2.5 years of experience, successfully transitioning from a strong foundation in software testing to architecting scalable, LLM-powered applications. Proven ability to build Agentic AI workflows and RAG systems, deploying robust solutions within AWS environments. Adept at leveraging Python, FastAPI, and LangChain to solve complex business problems, backed by hands-on QA experience with enterprise CRM platforms like Salesforce Marketing Cloud.

## PROFESSIONAL EXPERIENCE

---

**AI Engineer** | *[Tech Mahindra]* | Bangalore, India | *[February, 2025] – Present (1.5 Years)*

- Engineered and deployed a Retrieval-Augmented Generation (RAG) based AI agent on AWS, automating the resolution of complex customer queries and reducing manual response times.
- Developed a smart invoice resolution agent to process, analyze, and streamline billing workflows with high accuracy.
- Collaborated with a core technical team to build an Agentic AI solution integrated with New Relic; the system autonomously investigates dashboard alerts and compiles detailed resolution steps for the L2 support team.
- Maintained efficient project workflows and clean code versioning using Jira, Git, and GitHub, ensuring reliable CI/CD pipelines.

**Associate Software Engineer** | *[Tech Mahindra]* | Bangalore, India | *[December, 2023] – [January, 2025] (1 Year)*

- Conducted comprehensive end-to-end testing for a custom application built on Salesforce Marketing Cloud (SFMC).
- Validated omnichannel custom campaigns delivered via Twilio (WhatsApp, SMS, and RCS) by thoroughly analyzing and troubleshooting Twilio logs.
- Leveraged deep knowledge of SFMC to test and verify configurations across Data Extensions, Journey Builder, Content Builder, and scheduled jobs in Automation Studio.
- Tested both business-initiated and user-initiated campaigns, assisting in the creation and verification of content templates to ensure flawless delivery.

## EDUCATION

---

**Bachelor of Technology(B.TECH)– Computer Science and Engineering(CSE) 2019-2023**

Jawaharlal Nehru Technological University Anantapur College of Engineering, Kalikiri (83%)

## PROFESSIONAL SKILLS

---

- **Languages & Frameworks:** Python, FastAPI, Streamlit, Pydantic, SQL
- **AI & Development:** LangChain, LangGraph, RAG, LLM Integration, Agentic AI, GitHub Copilot
- **Cloud & DevOps:** AWS, Docker, CI/CD, Git, GitHub
- **Marketing & Tools:** Salesforce Marketing Cloud (SFMC), Twilio, Jira, Agile/Scrum (15-day sprints)

## CERTIFICATIONS

---

- AWS Certified Developer – Associate
- AWS Certified Cloud Practitioner
- GitHub Copilot Certification (GH300)
- Tech Mahindra AI White Belt & Blue Belt
- Git and Github :The Practical Guide certification provided by Udemy

## STRENGTHS

---

- **Productivity & Time Management:** Highly disciplined in maintaining rigorous schedules and organizing tasks. Proven ability to execute long-term technical roadmaps while balancing daily engineering deliverables.
- **Agile Planning (Scrum & Kanban):** Adept at structuring workflows, managing tickets, and maintaining momentum in strict 15-day sprint cycles to maximize team output and personal productivity.
- **Self-Confidence & Adaptability:** Approaches complex technical challenges—such as successfully pivoting from QA into advanced AI Engineering—with strong self-assurance, ownership, and a readiness to learn.
- **Systematic Problem Solving:** Strong ability to trace and resolve complex issues, from debugging Agentic AI workflows to investigating detailed enterprise logs.

## INTERESTS

---

- Exploring advanced multi-agent AI systems, cloud infrastructure, and building real-world IoT applications.
- Watching News

## LANGUAGE COMPETENCIES

---

Telugu: Native language, English: Fluent (Speaking, Reading, Writing), Hindi: Intermediate
